

Easy-to-use A/V for Every Classroom Environment

Now With Support for HDMI Digital Video Sources

Extron PoleVault® and WallVault™ Systems are all-inclusive, complete A/V systems that are easy to install, use, and support. Both systems offer an easy-to-use configurable control panel and a secure, fully enclosed, vented housing for wall-mounting or pole-mounting the switcher and power supply.

PoleVault and WallVault Systems now include options for accepting input signals from HDMI digital video sources, such as laptops, document cameras and Blu-ray Disc™ players.

Each Extron classroom A/V system includes all the projector control, switching, speakers, wall plates, and cabling needed for a complete A/V system. Everything is made, supplied, and supported by one manufacturer: Extron, where your satisfaction is guaranteed. All that remains is to add a video projector and screen, or flat panel display, and sources.

PoleVault and WallVault Systems offer:

- Complete, centralized A/V switching and control system that uses CAT 5-type twisted pair cable for quick, low cost installation
- **NEW** Optional HDMI input enables direct connection of high-definition video sources and provides support for future technologies
- **NEW** VoiceLift Microphone option - pendant and handheld wireless microphones work with PoleVault or WallVault to evenly distribute the teacher's voice throughout the room
- **NEW** WallVault Systems include an exclusive short throw projector mount that also conceals and protects A/V components
- Extron Exclusive Patent Pending Flat Field® speakers deliver consistent sound levels across the listening area
- Energy efficient design offers Extron exclusive power saving modes to lower energy usage and operation costs
- Network ready with integrated IP Link® and compatible with GlobalViewer® Enterprise software for district-wide control, asset management, lamp hour tracking, and help desk support
