

# The Industry's First Complete Family of ENERGY STAR® Qualified Amplifiers

## Extron Power Amplifiers

Extron is proud to be the first manufacturer in the pro AV industry to offer a complete family of ENERGY STAR qualified power amplifiers. All Extron power amplifiers are ENERGY STAR qualified with automatic power-down and less than 1 watt of power draw in standby. They are energy efficient products that conserve energy and reduce costs, featuring an Extron exclusive, highly efficient, advanced Class D design.

Extron power amplifiers are housed in compact, convection-cooled enclosures and do not require fans for cooling, making them ideal for installation in racks, lecterns, credenzas, and other locations with limited space and ventilation. They are available in a wide variety of low and high power models from 30 watts to 800 watts rms total output, and are ideal for a wide range of mono, stereo, and multi-channel applications.

### Key Features:

- ENERGY STAR qualified
- Draws less than 1 watt in standby mode
- Professional grade signal-to-noise and THD performance
- Extron Patented CDRS - Class D Ripple Suppression
- Convection cooled, fanless operation
- Auto power-down with fast power-up
- Compact, space efficient enclosures
