

Extron and Logitech

PROVIDING COMPLETE CONTROL FOR THE NEW
GENERATION OF MEETING ENVIRONMENTS

As part of the Logitech Collaboration Program, Extron and Logitech are offering some exciting collaboration solutions. These include the latest collaboration tools, such as Logitech SmartDock and Tap, while adding easy automation features and professional control integration capabilities to the modern workspace. Logitech collaboration products

can be equipped with Extron control systems, audio signal processors, and digital video switching and distribution. Meeting attendees will benefit from a significant expansion of meeting collaboration features and the convenience of AV room control from a familiar user interface.

Building Management Systems

Device Management and Analytics

Display and AV Devices

Lighting and Shades

Any room with a SmartDock or Tap is equipped to utilize Extron's powerful AV control capabilities, delivering a turn-key collaboration and control solution that's ideal for any presentation application.

- ▶ Extends the capabilities of Logitech products to fully-customize applications where AV or environmental control is needed
- ▶ Combines Extron device controls for meeting spaces equipped with Logitech SmartDock or Logitech Tap as the primary interface
- ▶ Integrate occupancy sensors to automate lighting, display power, shade control, and other devices
- ▶ Adjust temperature, control display power, communicate with building management systems from a familiar interface
